Trinnov Manufacturer PEQ - Supported Speaker Models - K-Array

This document is to guide you which models are supported by our manufacturer PEQ option. These are all the speaker models supported when you download the PEQ files from the Trinnov website. It's advised you check this list prior to uploading the PEQ to make sure the speaker you require is supported.

List of supported speakers for K-Array:

- KANA200(+)
- KF26
- KK102
- KK52
- KKS50
- KMT18P
- KMT21P
- KP102
- KP52
- KRM33P
- KT2
- KT20
- KY102
- KU210
- KU212
- KU26
- KU36
- KU44
- KV52
- KX12
- KZ10
- KZ12
- Piccolo Mid-High
- Piccolo Subwoofer

If you find the speaker you require is not in this list please contact the speaker manufacturer and, where required, have them supply the relevant information to support@trinnov.com and we will have this model added to the list.

Note: not all manufacturers or speakers require PEQ so please check with the manufacturer before consulting our support team.
